INTRODUCING THE BUSINESS OF LIFE PROGRAM

BALI 8-14 JUNE 2024

Where accomplished individuals reignite their sense of purpose, develop new opportunities and recalibrate wellness to thrive in life's next phase.

Deciding to spend more time out of business or leaving it all together doesn't need to mean winding down,

It's taking what you've already achieved to make a greater impact and seeing how life gets to be even better.

Knowing it's time for action might look something like this:

- You've worked at building your skills and experience and the idea of tapping into them and exploring unrealised talents, is something you've been thinking about for some time.
- The years of unwavering commitments, even to those you remembered last minute or missed altogether... leave you only to imagine life on your terms.
- Realigning your well-being has been on your "to-do" list for far too long. It's not about finding the time; it's about shifting the balance towards what you truly desire and leaving behind what no longer serves you.
- While you've enjoyed bucket-list purchases like trips and new cars, you're not ready to settle. You feel that there's a deeper impact to be made through your existing expertise. It's time to back yourself into a new phase.
- You want to remain connected to your community, stay informed and contribute to a more meaningful purpose in life's next chapter. Transforming your experiences into a concrete plan would inject newfound energy into your current situation and beyond.

WHAT NEXT?

You hold the power to shape life's next chapter or allow circumstances to dictate its course.

Stepping into a new chapter can be both a significant opportunity and a challenge.

The arrival of your next life stage is inevitable, this isn't just a concept.

What matters is the quality of life it offers and this hinges on taking charge of life's direction sooner rather than later.

This is exactly what The Business of Life program is designed to help you do.

Currently over 4 million Australians between 55-70 years are facing an inflection point in their careers and lives. There hasn't been much attention given to optimising this phase of life, yet it is a rite of passage for a fulfilling life.

A life of your own design becomes a tangible prospect when you give yourself the permission to set up your next chapter with what you truly want.

"The focus of the program (Transformational Leadership) was the aspect of bringing one's "heart" to work as well as one's brain. It was to be about personal authenticity, self-awareness, integrity and emotional maturity. Larry's Art of Conscious Leadership was unique for its simplicity in understanding yet very personalised for the individual and the ability to be practically applied."
